 [LinkedIn-profile](#) chikmagalur

Karnataka-577132, India

OBJECTIVE

Motivated and detail-oriented professional with a strong foundation in Python Full Stack Development and Android Application Development. Proficient in HTML, CSS, JavaScript, Bootstrap, and MySQL, with hands-on experience in responsive web design, user interface development, and mobile app creation. Seeking a challenging position to leverage my technical skills and contribute to innovative software and mobile projects.

EXPERIENCE

Backend Development Intern

Aug 2025 – Nov 2025

Healthletic Lifestyle

Bangalore

- Built and deployed backend for a real-time mobile app enhancing user engagement.
- Developed RESTful APIs with Node.js & Express and integrated MongoDB for efficient data handling.
- Tested and validated endpoints using Postman, improving API reliability and performance.
- Contributed to an agile team delivering production-ready backend solutions.
- Implemented secure authentication and user management features to enhance data privacy.
- Optimized API response times by 30% through efficient query structuring and caching techniques.

Cyber Security Intern

2023 -2024

Yhills (in association with E-Cell IIT Hyderabad)

Virtual Internship

- Completed a two-month virtual internship focused on Cyber Security and Ethical Hacking fundamentals.
- Gained hands-on experience with Linux security tools, network scanning, and vulnerability assessment techniques.
- Learned penetration testing methods and basic exploit prevention strategies.
- Explored encryption, password security, and firewall configuration for secure systems.
- Worked on practical tasks simulating real-world cyber threats and defense mechanisms.

EDUCATION

PRESIDENCY UNIVERSITY

MCA- Master Of Computer Applications

Bangalore

Sep. 2024– Jun 2026

SDM COLLEGE

B.voc In Software And Application Development

Ujire

Mar. 2022– Jun 2024

PROJECTS:

Brain Tumor Detection Web App | Python, Flask, HTML, CSS, JavaScript, CNN

Ongoing (2025)

- Developing an AI-powered web app to detect brain tumors from MRI scan images using a CNN model.
- Implemented Python and Flask for backend processing and model integration.
- Built a simple and responsive frontend using HTML, CSS, and JavaScript for image upload and result display.
- The system predicts tumor presence and stage, providing accurate real-time insights for users.

Event Management (Paurohitya) Web App | Using Mern Stack MongoDB, Clerk

(JAN2025)

- Created a web app to help users book Paurohityas (priests) for events in cities like Bangalore and Mumbai.
- Designed a clean and responsive UI using Next.js, React, and Tailwind CSS.
- Used MongoDB to store booking details and manage user data securely.
- Added Clerk authentication for safe user login and account handling.
- Built APIs for booking, scheduling, and managing event services smoothly.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS

Frameworks: React,

Developer Tools: Git, Google Cloud Platform, VS Code, Visual Studio, IntelliJ, Eclipse, Android Studio

Libraries: Pandas, NumPy, Matplotlib
